LOOK UP TO ELAVATION™

DESIGNED TO MEET THE HIGHEST FALL PROTECTION STANDARDS.

THERE'S NOTHING ORDINARY ABOUT IT. Elavation incorporates the most advanced ideas in harness design. Ideas that make fitting, adjusting, and wearing easier and more comfortable than ever. Ideas that

IF YOU ARE LOOKING FOR AN ORDINARY HARNESS, LOOK ELSEWHERE.

assure solid confidence by delivering solid performance. Ideas that don't restrict on-the-job movement, but enhance it. Ideas that ultimately boost compliance, because they make wearing a harness feel better – all day long.

WHEN YOU WANT EXTRAORDINARY, LOOK UP TO ELAVATION.

MODEL 7510

MODEL 7552

Quick Connect Buckles

Fast On-and-Offs make starting the day and ending the day easier than ever for ELAVATION wearers.

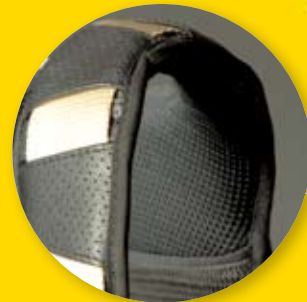

"Targeted" Padding for Added Comfort

Comfort only where it's needed around the shoulders and back D-ring. Over-padding is avoided elsewhere to allow easy movement and minimize weight.

Cushioned Leg Pads

Pads provide additional bind-free comfort that is important during long wear periods. They can be removed if not needed.

**RATED AT
400 LBS.**

Soft, Breathable Back Pad incorporates perforated foam and durable fabric to allow air to flow in-and-out for cooler wear and to help wick moisture for extended comfort.

Slide & Tuck Web Keepers keep web slack from looping, dangling or tangling.

Easy-Access, Integral Lanyard Keeper makes attaching and detaching a "snap" while helping prevent dangerous tangles and snagging.

Torso Adjustments with Fingertip Control are possible with the gravity-based simplicity of the Elavation Red Ring System.

Optional D-Ring Extension is available for quicker connections and easier access to back D-ring.

Built-In Fall Indicator is located right below the back D-ring to make inspection quick and simple.

Protected Label Pack helps keep instructions, inspection and compliance information intact and easily accessible.

FormFit Webbing is lightweight and designed to wrap and "mold" to the wearer's body to support comfortably with sure confidence.

The Elavation harness exceeds OSHA 1926, ANSI Z359.1, and CSA Z259.10 Standards
